Walking

• Plan your way in advance. Choose well-traveled routes. Use discretion when talking or walking with strangers, even if they are offering you help or assistance. Always keep moving toward your destination. Walk with purpose.

• When possible, try to travel with friends, whether it is daytime or evening. Just remember: There is safety in numbers.

• Avoid deserted areas. Do not cut through parks, alleys, and vacant lots at night.

• If you think you are being followed, cross the street, change direction, or go to a public place where others are present.
• If a person confronts you and demands your money or possessions, give what is demanded and create a safe distance.

• Keep alert. Don’t let a conversation on your cell phone or the use of headphones make you unaware of your surroundings.

• Use caution when using automated teller machines (ATMs). Select one located in a busy, well-lighted area. Plan ahead so you are not forced to find a machine in an unfamiliar part of town.
Bicycle Safety and the Law

- The same laws that apply to motorists in Illinois apply to cyclists. For your safety and the safety of others, obey all traffic lights, signs, and markings.

- Illinois law requires every bicycle in use at night to be equipped with a white light lamp on the front, visible from a distance of 500 feet, and a red reflector or red light on the rear, visible from a distance of 600 feet.

- Be visible. Wear brightly colored clothing. Wear a reflective vest or flashing light so you are visible to motorists at night.
Bicycle Theft Prevention

- Register your bike at the UCPD dispatch center at 6054 S. Drexel Avenue. Call UCPD at 773-702-8181 for information.

- Use a “horseshoe” lock to secure your bike to a bike rack. Leave minimal space between the lock and the bicycle, making theft harder. Keep the lock off the ground to avoid it being smashed or used as leverage.

- Do not lock your bicycle to a sign pole or parking meter. The bike can easily be hoisted over the sign or meter.

- Always remove “quick release” front wheel or bicycle seat and secure to the wheel or frame.
• Bicycles should be properly secured and stored inside when possible.

• Immediately report suspicious persons and activities around bike racks.

• Use a “horseshoe” lock to secure your bike to appropriate structures such as bike racks, signposts, or iron fences. Avoid chaining a bicycle to banisters or handrails; it is a safety hazard.

• Register your bike with University Police; they will provide you with a numbered identification sticker and put it on record with the Chicago Police Department.
Using Public Transportation

- Avoid isolated bus or train stops and times when few other people are around.

- Keep your belongings on your lap if possible.

- Use a Chicago Card Plus to avoid running out of money when traveling
